

AcoustaBar™

40" Home Theater Surround Sound

Dynavox AcoustaBar™ All-in-One Home Theater system, built on SRS™ 3D WoW™ technology, features 6 drivers, including dual sub-woofers, delivering 520 watts of total power to bring the listening experience of a movie theater to your home. Dialogue clarity is also improved, and the sound field is dramatically expanded both horizontally and vertically.

iPod® Friendly

Turn your iPod®, or iTunes® into a room filling surround sound audio system just by placing the iPod® player in the docking unit. AcoustaBar™ system is easily controlled with the supplied remote controller. All iPod® functions are available through system remote controller. iPod® player can even be recharged while it is being played or turned off.

AcoustaBar™

Power Bass Compression Engine

Dynavox AcoustaBar™ All-in-One Home Theater system is equipped with our patented Power Bass Compression Engine to enhance low frequencies performance. Powerful and impressive bass can be delivered throughout the listening space and rock you along with the music rhythm from head to heel.

Simple Connection in 2 minutes!

AcoustaBar™, a single unit 40" sound bar, requires just a left and right audio connection and AC power; the system is now set up! AcoustaBar™ is easily hooked up to a variety of sound sources. AcoustaBar™ will complement any flat screen HD TV by merely placing it in front of the TV or it can be mounted on the wall.

Amp	Output	Consumption
AcoustaBar™	520 watt	8 watt
Conventional	500 watt	200 watt

**Save energy,
Save money!**

Green Speaker Certified

By utilizing both Switching Power Supply as well as internal Power Bass Compression Engine technology, the AcoustaBar system produces dramatic sound effect with low power consumption. From the comparison chart above, it clearly indicates that 520 watts sound output can be achieved by a merely 8 watt electricity while a conventional system will require a huge 200 watts electricity to produce the same amount of sound output level.

Amp	Nominal	Actual
AcoustaBar™	520 watt	520 watt
Conventional	500 watt	350-500 watt

Universal Application

AcoustaBar™ All-in-One Home Theater system can be connected to almost all media players such as CD, DVD, iPod® MP3/MP4, TV, Satellite and Cable. A world power DC adaptor is provided to be used for many region of the world. Connection cables, remote control batteries as well as mounting plates are also included.
